

Khalifa University (KU) is committed to improve the environment, health and safety and energy performance of our activities of all people who work, study, or visit the organization.

We continually improve our Environment, Health, Safety & Energy Management System (EHS & Energy MS) and performance through our unique cycle of developing, implementing, maintaining and reviewing the EHS & Energy Management System across all campuses towards the accomplishment of Abu Dhabi government vision 2030 and UAE Energy Strategy 2050

Regular updates and changes are communicated to all concerned, including internal & external interested parties through intranet, public display and training.
